## SKILLS

Problem Solving
Creativity
Teamwork
Debugging
Quick Learner
Adaptability

## LANGUAGES

Hindi
*Full Professional Proficiency*

English
*Professional Working Proficiency*

Gujrati
*Native or Bilingual Proficiency*

## TOOLS

Git
GitHub
Docker
Linux
Postman
Cursor AI
PhpStorm
VSCode
GitHub Copilot

## EDUCATION

Mechanical Engineering
Government Engineering College - Rajkot
*06/2014 - 06/2018*

# Anil Parmar

Full Stack Developer

## SUMMARY

I'm a passionate Full Stack Developer with 5+ years of experience in building modern web applications. I focus on creating clean, efficient, and user-friendly solutions using the latest technologies.

My journey in web development started with a curiosity about how websites work, and it has evolved into a career where I get to solve interesting problems and create meaningful digital experiences every day.

## TECHNOLOGIES

| | |
|---|---|
| **Backend** | PHP, Laravel, Livewire, Filament PHP, Inertia.js, PestPHP, MySQL, Meilisearch, WordPress |
| **Frontend** | HTML, CSS, Tailwind CSS, Bootstrap, JavaScript, TypeScript, Vue.js, Alpine.js, React.js, Next.js, jQuery |
| **Mobile** | React Native, Flutter (basic) |
| **DevOps & Cloud** | Linux, Docker, Nginx, FrankenPHP, AWS, DigitalOcean, cPanel/WHM, SSL Management, Server Deployment & Maintenance |

## WORK EXPERIENCE

### Senior Laravel Developer

Wealthmech Indian Pvt Ltd · Full-time

08/2026 - Present · 3 mos — *Rajkot, Gujarat, India · On-site*

*Achievements/Tasks*

- Developing and enhancing an EdTech platform by implementing new features, optimizing backend performance, managing database operations, and ensuring application stability. (Technologies: Laravel, PHP, MySQL, Bootstrap, jQuery, Git)

### Full Stack Developer

Dezvo Technologies LLP · Full-time

08/2025 - 06/2026 · 11 mos — *Halvad, Gujarat, India · Remote*

*Achievements/Tasks*

- **Chhelli Jagir:** Built a news CMS platform focused on performance and SEO with dynamic article management, category management, and author profiles. (Technologies: Laravel, Livewire, Filament PHP, MySQL, Docker, FrankenPHP) https://chhellijagir.com
- **E-Commerce Platform:** Built a full-featured e-commerce platform with product variants, multi-warehouse inventory, order lifecycle, returns/replacements, and a storefront. Integrated Razorpay payments plus ShipRocket/Delhivery shipping APIs with webhook automation. (Technologies: Laravel, Filament PHP, Livewire 3, Tailwind CSS 4) https://github.com/anilparmar-code/filament-ecommerce
- **ShelfCurator:** Developed a SaaS storefront platform empowering influencers and creators to launch branded storefronts, showcase affiliate products, and monetize recommendations with custom domains and analytics. (Technologies: Laravel, Livewire, MySQL, Nginx, TailwindCSS, Certbot) https://github.com/anilparmar-code/shelfcurator

### Sr. Backend Developer

Joistic

02/2025 - 07/2025 — *Thane, Maharashtra, India · Remote*

*Achievements/Tasks*

- **TicketRoot Event Management System:** Migrated the admin panel from Livewire to Filament PHP, improving performance, UI, and maintainability. Developed seating layout management for ticket booking, implemented role-based ticket badge generation, and integrated AWS Rekognition for face matching to help attendees find their event photos. (Technologies: Laravel, Vue.js, Filament PHP, Livewire, MySQL, AI Integration, AWS Rekognition) https://ticketroot.com
- **Chef Discovery Platform:** Developed a platform that helps users discover and connect with chefs. Built chef onboarding workflows, chef profile pages showcasing experience, services, and menus, along with search and discovery features. Developed an admin panel to manage chefs, services, menus, and platform content. (Technologies: Laravel, Livewire, Filament PHP, MySQL)

### Laravel Developer

The Developers

05/2023 - 01/2025 *Jamnagar, Gujarat, India · Remote*

*Achievements/Tasks*

- **Voter Management:** Built a voter management platform for election campaigns, enabling voter data analysis and relationship management. Implemented large-scale voter data import/export using Laravel Queue Jobs and optimized voter search with Laravel Scout and self-hosted Meilisearch for fast searching across millions of records. (Technologies: Laravel, PHP, Vuejs, MySQL, Laravel Scout, Meilisearch, Queue Jobs, Tailwind CSS)
- **SacredOhms Property Booking Platform:** Developed a property booking platform with property listings, search and filtering, booking management, and payment integration. Built an admin panel for property owners to manage properties, availability, bookings, and listing details. (Technologies: Laravel, Livewire, PHP, MySQL, Stripe) https://sacredohms.com/
- **Social Media Platform:** Built a feature-rich social media platform with free and paid post publishing, enabling users to purchase premium post visibility. Developed core social networking features including user profiles, likes, comments and realtime messaging. Implemented secure payment integration for paid posts. (Technologies: Laravel, Vue.js, Pinia, Websocket, Axios, MySQL, REST API, Payment Integration)

### Laravel Developer

KCFORCLOUD TECHNOLOGIES L.L.C

05/2022 - 04/2023 *Dubai, UAE · Remote*

*Achievements/Tasks*

- **IPTV Streaming Application:** Developed a cross-platform IPTV mobile application enabling users to securely access live TV channels and video-on-demand content based on their IPTV provider. Implemented provider authentication, playlist (M3U), content categorization, search, favorites, and seamless video playback, delivering a responsive and user-friendly streaming experience. (Technologies: React Native, Laravel, MySQL, REST API, IPTV, M3U)
- **Laundry Android App:** Created a mobile laundry service app allowing users to create orders by selecting from different service options such as washing, ironing, and dry cleaning. (Technologies: Laravel, MySQL, React Native, Linux Server)
- **Chat Application:** Designed and developed a real-time chat application for internal use, featuring one-to-one messaging, WebSocket-based real-time communication, and WebRTC-powered video meetings. Deployed and managed the application infrastructure on DigitalOcean Droplets. (Technologies: Laravel, MySQL, React Native, WebSockets, WebRTC, DigitalOcean Droplet)
- **KC4Cloud Company Website:** Designed and developed the frontend of a cloud-based enterprise management platform using WordPress, creating responsive, user-friendly pages and layouts based on UI designs. (Technologies: WordPress, HTML, CSS, JavaScript, jQuery, Bootstrap) https://www.kcforcloud.com

### Web Developer

Self-employed · Freelancer

01/2021 - 04/2022 *Halvad, Gujarat, India*

*Achievements/Tasks*

- **E-Commerce Store & Business Directory:** Built an e-commerce store and a location-based business directory with SEO optimization. (Technologies: PHP, Laravel, Blade, Vue.js, MySQL)

## TECHNICAL EXPERTISE

- Laravel Framework & Ecosystem (Livewire, Filament PHP, etc.)
- Eloquent ORM, Query Optimization & Database Indexing
- Queues, Jobs, Events, Listeners & Task Scheduling
- Caching, Session Management & Application Optimization
- MySQL Database Design, Relationships & Performance Optimization
- Authentication & Authorization (Sanctum, Policies, Roles & Permissions)
- REST API Development & Third-Party Integrations
- API Rate Limiting & Security Best Practices
- Payment Gateway Integrations (Stripe, PayPal, Cashfree, etc.)
- WebRTC, WebSockets & Real-Time Applications
- File Storage Systems (S3, DigitalOcean Spaces)
- Clean Code Architecture, Debugging & Testing
- Laravel Horizon & Queue Monitoring
- Background Processing & Async Workflows
- Search Integration with Meilisearch / Algolia
- Git, GitHub & CI/CD Workflows
- Docker, Linux Server Management & Application Deployment
- Nginx, SSL Setup, Domain Configuration & Server Security
- Scalable Web Application Development
- Multi-Tenant Application Development
- SEO Optimization for Web Applications
- React Native Mobile Application Development

- Basic Knowledge of Flutter & Next.js
- AI-Assisted Coding & Development (Cursor AI, GitHub Copilot, Antigravity, etc.)
